

KARTHIKEYAN L N R

+917598937059 lnrkarthikeyan345@gmail.com [LinkedIn](#) [GitHub](#) Madurai, India

PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate with strong skills in Python, SQL, Power BI, and data analysis. Experienced in building analytics dashboards, processing datasets, and developing data-driven solutions through academic projects. Proficient in data visualization, KPI reporting, and business intelligence workflows with a passion for turning raw data into actionable insights.

EDUCATIONS

Amrita Vishwa Vidyapeetham <i>Bachelor of Technology in Computer Science Engineering</i>	2022 - 2026 CGPA : 7.71/10
Mahatma CBSE School <i>Higher Secondary Education (Class XII)</i>	2021 - 2022 Percentage : 83%
Mahatma Montessori Matriculation Higher Secondary School <i>Secondary Education (Class X)</i>	2019 - 2020 Percentage : 70%

PROJECTS

Financial Sales Dashboard | [Github](#)

- Developed a 5-page interactive Power BI dashboard analyzing sales performance, customer behavior, regional trends, and payment channels.
- Developed DAX measures to track Total Sales (2.8M), Total Orders (200), Average Feedback Score, and Transaction Success Rate.
- Built dynamic reports with slicers, navigation menus, and drill-down capabilities to support self-service business reporting.
- Surfaced key insights on top-performing regions, highest-spending customer age groups, and payment channel efficiency to drive data-driven decisions.

Technologies / Tools Used : Power BI, DAX, Power Query

HealthOps Intelligence | [Github](#)

- Designed a healthcare analytics platform to evaluate hospital performance across 3+ CMS datasets.
- Architected an end-to-end ETL pipeline with PostgreSQL, KPI monitoring, and Power BI, cutting retrieval time by 30%.
- Developed a scalable framework for healthcare data analysis supporting 5+ modules utilizing FastAPI.
- Planned benchmarking workflows targeting 20%+ improvement in hospital reporting efficiency.

Technologies / Tools Used : Python, PostgreSQL, Power BI, FastAPI

Superstore Sales Analytics Dashboard | [Github](#)

- Built an interactive Power BI dashboard on a dataset of 9,994 sales records to analyze revenue, profitability, customer segments, and regional performance.
- Designed 4 dashboard visualizations and KPI cards tracking sales trends, category profitability, and state-wise performance across the USA.
- Applied data storytelling techniques to identify high-performing product categories, profitable regions, and long-term sales growth trends.
- Implemented interactive slicers and cross-filtering features to enable dynamic, self-service business reporting and insight generation.

Technologies / Tools Used : Power BI, Excel

SKILLS

Databases :	MySQL, PostgreSQL, MS SQL Server
Frameworks & Libraries :	Pandas, NumPy
Programming Languages :	Python, SQL
Soft Skills :	Analytical Thinking, Problem Solving, Attention to Detail, Team Collaboration
Tools & Platforms :	Power BI, Excel, Pandas, NumPy, Git, Alteryx, Jupyter Notebook, VS Code

CERTIFICATIONS

- Data Analyst Associate — DataCamp
- Alteryx Designer Core Certified — Alteryx
- Google Cloud Computing Foundations — NPTEL (77/100)
